Express bi-folding doors perfectly complement stunning extension

Aluminium bi folding doors from Express Bi-folding Doors were used to great effect in a stunning kitchen extension in York. The façade of glass is 2.4 metres high creating a huge panoramic glass wall that ensures all the doors frames look sleek, slender and allow maximum natural light into the property.

There is no doubt that this is an architect-designed extension. The kitchen blends into a huge open plan living and dining area, containing three separate areas that can all be opened out to the garden.

The cool anthracite grey finish of the doors and windows always looks stunning against cream render, but this is complemented further by the cedar cladding and light fittings above the doors, and the matching coloured fascia adding a contemporary finishing touch to the flat roof extension. The experts at [GIA-MAC Architects](#) also did a wonderful job with the elevated patio area centralised to the main bi-folds leading out onto the grass garden.

Express Bi-folding Doors manufactured the front door and all of the windows throughout this property in York but it is the rear extension pictured here which is undoubtedly where the company's products are best showcased.

There are three bi-folding doors spanning the full width of the property. Two panel bi-folding doors both at 2400mm wide sit at either end of the property with picture windows meeting at the corner forming a glazed return back to the huge six-metre folding door that dominates the rear of the extension. The four steel posts that support this huge extension have all been cloaked with bespoke aluminium pressings, which has created a cohesive look to the whole installation, seamlessly connecting the various door and window products across the elevation.

Express Bi-folding Doors carries out installations like this to the highest standards all over the UK and several installations of this type can be viewed in the company's showrooms in [Glasgow](#), [Redhill](#), [Romford](#) and [Leeds](#). Here, visitors planning a new kitchen extension can be inspired by displays showing the premium XP View bi-fold doors installed around superb kitchens.
