## **Addaset show drive for a show home**

***Addagrip is delighted to have been asked to install a beautiful resin bound porous driveway for Scandia-Hus, which designs and manufactures energy-saving timber frame homes, as part of the company's stunning new Show Home at a site in Felcourt, West Sussex.***

The Addaset resin bound surface was selected in a 6mm Lucerne Silver aggregate blend to create a feature driveway to enhance the contemporary design of the Show Home and complement the Casarta Slate patio and clean lines of the planting scheme. The Addaset product is fully porous and provides a high quality, hard wearing, low maintenance, decorative, seamless surface in keeping with the high specification finish of the stunning Scandia-Hus Show Home.

Derek Dawson, Managing Director at Scandia-Hus, adds: "We are absolutely delighted with the supply and install of the Addagrip Lucerne Silver resin bound porous driveway. As our Show Home showcases the top end of our specification, it was important to us to work with a local supplier that had a first class installation team who could match our exacting standards and that of our clients. The first few visitors have already been impressed with the driveway and we look forward to the start of a great working relationship with Addagrip."

The Show Home at Felcourt is open by appointment Monday to Friday 9.30am - 4.30pm and Saturday 10am - 4pm. Email [sales@scandia-hus.co.uk](mailto:sales@scandia-hus.co.uk) or telephone 01342 838060 for more details.

Addagrip looks forward to working with Scandia-Hus on future projects.
