Ahmarra supplies laminate fire doors for innovation centre

Main contractor, Morgan Sindall, has successfully handed over the new £7m extension to Fareham Innovation Centre at Daedalus which features Ahmarra's timber fire doors throughout.

Ahmarra manufactured more than 100 bespoke laminate fire doors to the customers' specific requirements including specialist acoustic doors. All doors were supplied and installed under the Q-Mark Fire Door Manufacturer and Fire Door Installer Schemes, which ensures a fully compliant and third-party certified product.

Danny Fowles, Ahmarra's Project Director, said: "Ahmarra is very proud to have been selected to both manufacture and install the fire doors by the main contractor, Morgan Sindall. The Innovation Centre is a great asset to the local economy and workforce and as Ahmarra is also based in Hampshire, it was an honour to form part of this landmark local project which was completed both on time and on budget by Morgan Sindall."

The project has been developed and funded by Fareham Borough Council and supported by £2m funding from Solent Local Enterprise Partnership (LEP) from the Government's Local Growth Fund.

The new space provides 3,400 square metres which include 33 new offices, five new workshops and spacious new conference facilities. This adds to the top of the range facilities and support already provided at the Innovation Centre for new businesses, especially those in the engineering, aerospace, aviation and marine industries.

If you would like to discuss your internal fire door requirements with Ahmarra, please visit www.ahmarra.co.uk for more information.
