Ahmarra supplies and installs fire doors for major tower block refurbishment

Ahmarra has been selected to supply and install hundreds of fire doors for a major Southampton tower block refurbishment.

Southampton's tallest tower blocks are undergoing a multi-million pound fire safety upgrade and Ahmarra is working with main contractor, [CLC Group](#) and Southampton City Council to supply Q-Mark certified fire doors, riser doors and screens to all communal areas as well as Secured By Design PAS 24 security & fire doorsets to all flat entrances.

Ahmarra has developed a range of apartment entrance doorsets that meet both fire and enhanced security requirements achieving the new requirement for "Dual Certification". These doorsets have been specified by leading social housing providers throughout London and the South East.

Martyn Fennell, Ahmarra Business Development Manager, said: "Ahmarra offer complete reassurance for our customers that the installed doorset will perform against the threat of fire, smoke and opportunist thieves should the need arise. We ensure this through regular audit testing as well as building our own body of primary test evidence ensuring a certified and compliant product.

"We can offer a complete turnkey service, from initial survey on your existing doors and openings, to arranging and installing replacement doorsets that are [Q-Mark certified](#) for both manufacture and installation."

Ahmarra [Secured By Design/PAS 24](#) doorsets are supplied as a complete pre-hung doorset available with all associated ironmongery factory fitted, on a supply-only or supply and fit basis. All doorsets are bespoke manufactured and include a number of facing and finish options including primed, natural timber veneers and high-pressure laminates as well as options for a wide selection of ironmongery to suit budget and aesthetic requirements.
