

Press Release  
24<sup>th</sup> November 2010

## New Harmer Drainage Website from Alumasc

***Alumasc has launched its new Drainage Website - the latest in a series of brand-specific online resources that covers the company's extensive range of products and services. The new website serves as a powerful tool for the specification of Alumasc's Harmer Drainage Systems.***

The well respected Harmer range of Roof Outlets, Floor and Shower Drains and Cast Iron Soil and Waste Systems are detailed on the site, clearly defining the choice of systems available for a range of applications. Associated NBS specification documents, CAD drawings and product datasheets can be accessed via the new 'Quicklinks' section available on every page along with an easy route to the Roof Outlet Calculation Tool and a comprehensive library of sector-specific case studies, illustrating Alumasc Harmer Drainage Systems in situ on a wide range of projects nationwide.

New technical content includes full details on the newly launched Harmer Shower Drain range, available in Aluminium or ABS and the Harmer Kessel rainwater management systems which further strengthen Alumasc's environmental product portfolio and commitment to sustainable building solutions.

The secure 'My File' area facilitates the creation and management of a personal 'basket' of technical documents and downloads. By selecting datasheets, brochures and other online material, users can store project-specific material on the site for future retrieval or can choose to email selected files direct to industry colleagues.

Full product code listings, flowrates and price lists, plus an invaluable list of merchant stockists, complete the site content.

Alumasc's new Drainage website provides comprehensive data on a range of solutions suited to any new build or refurbishment project. The ongoing development of its online resources further supports Alumasc's continued commitment to meet the changing needs of its colleagues in the Construction Sector.

For further details on the full range of Alumasc Drainage Systems, please visit the new site at [www.alumascdrainage.co.uk](http://www.alumascdrainage.co.uk)

To order hard copy Harmer Drainage product literature, please call Alumasc on 0808 100 2008.
