## **Balcony Systems Offers Glass Juliette Balconies for Under £200**

***Balcony Systems, the UK's leading balustrading supplier, is aiming to conquer the glass Juliette balcony market with its affordable, stylish and popular product costing from under £200.***

At £199, the BAL 128 version, measuring 1,280mm with white handrail, is available in various quantities – from just a single unit to bulk delivery for larger housing schemes.

Low-maintenance glass Juliette balconies are not only a great deal on initial purchase, but also prove to be a long-term cost-effective choice when compared to conventional balustrading materials as they don't require painting or repairs. Clear glass retains views and maximises light to the interior, while a wipe down with a wet cloth keeps them sparkling.

The Juliette balcony range includes 28 different standard models with aluminium handrail finishes in white, silver, bronze or Royal Chrome. Bespoke sizes and colours can be supplied for bulk orders to suit any client specification and budget.

Commenting on the lower price, Balcony Systems' Managing Director, Effi Wolff, says: "With our genuinely affordable Juliette balcony range, we're challenging people's perceptions that glass balconies are expensive. In fact, our glass and aluminium products cost about the same as steel – but work out cheaper in the long run as you don't have to paint them.

"With the added advantages of corrosion-resistance for coastal areas, contemporary clean lines and ease of installation, we're already seeing a tremendous response from purchasers seeking a value-for-money balustrade, which also looks good," he adds.
