Faithful+Gould choose Causeway to help deliver Qatar's Vision

Faithful+Gould (F+G), one of the world's leading engineering and project management consultancies, has selected Causeway software for cost planning and cost management across its expanding Qatar operations, driven by FIFA 2022 and Qatar's 2030 vision for world class infrastructure development. They will also be using Causeway BIMMeasure to facilitate the ease of cost planning and estimating project information from the use of Building Information Models.

F+G is already a long-term user of Causeway CATO in other global regions. "The complexity of these projects means that we need a powerful cost planning and cost management tool to ensure we manage costs efficiently and deliver value to our client," commented Mark Rudman, Regional Director. "Having used Causeway CATO on a wide range of projects we knew that it would deliver the functionality we require, while BIMMeasure will help ensure we gain the maximum benefits from BIM on the major projects," he added.

Paul Madeira, Causeway Chief Operating Officer, commented: "The National Vision aims at transforming Qatar into an advanced country by 2030, capable of sustaining its own development and providing for a high standard of living for all of its people for generations to come. We are delighted that F+G has selected Causeway CATO, which can be used to manage data across the full lifecycle of the projects. CATO's ability to allow multiple users to access the same information will prove invaluable with such a breadth of projects underway within overlapping timescales."
