Cemplas launches car parking refurbishment brochure

Cemplas Waterproofing and Concrete Repairs Ltd has produced a new Car Parking Refurbishment brochure which could prove invaluable to architects, engineers and the owners of heavy-use car parks, such as hotels and supermarkets.

The 10-page brochure, available as a PDF, is packed with information about Cemplas and the many car park projects the company has completed over the years. Staff have provided cost-effective solutions to scores of clients, including blue chip companies, to extend the life of surface and multi-storey car parking areas. Work done can include everything from concrete repair and corrosion control to deck waterproofing and specialist coatings, stairwell redecoration and signage.

An enquiry page on the brochure has space to fill in numerous details about the car park site that will help a contractor to provide a quote.

To talk to one of the knowledgeable staff about car park refurbishment projects, contact Cemplas on 02086 543 149.
