Cibes lift allows children to move around school

A Cibes lift installed in a Montessori School allows even small children safe access to all floors of the school building.

The school in Bogotá, Colombia, chose a [Cibes A5000](#) to link the library and auditorium to the rest of the building. It is the first school in the region to offer staff and pupils the comfort of a lift and is used by staff and pupils every day.

Cibes lifts are [safe and easy to use](#), even for small children, providing comfortable access to every room. The auto lock system allows the staff to control the use of the lift.

In this project, to preserve a maximum of space, the Cibes A5000 lift is fitted at the centre of the staircase. The glass shaft and panoramic doors of the lift preserves the natural light of the building.
