Cosyfloor offers Clutter Free Comfort Heating

Cosyfloor quality underfloor comfort heating is ideal for kitchens where so often space, taken up by large unsightly radiators, could be used more effectively.

Electric underfloor heating is unobtrusive, clean and works well on any solid based level floor.

Whether your choice is for tiles, marble, natural stone or hardwood, the 'invisible' matting silently warms the surface of the floor to an even temperature, giving a gentle glowing warmth.

Photo shows: A modern kitchen is easy to keep warm with Cosyfloor™ underfloor heating.

The heating system is easy to install, has low running costs and is maintenance free. Various controls can be supplied as appropriate to allow temperature adjustment to suit requirements.

There are no unsightly radiators, no drips, no noise, no servicing. Costs £29 for 1 sq metre. Also available: Ecofloor and Ecomats.
