Stylish aluminium fencing adds to FH Brundle range

Metal products specialist FH Brundle has introduced four new styles of aluminium fence/railings, adding even more style to what is already one of the most extensive ranges of stocked metal fences available in the UK.

Marano® aluminium fencing offers long lasting, low maintenance, easy to work with solutions that are also lightweight. Boards and slats are available in two different finishes, a realistic golden oak wood effect and a contemporary anthracite grey. The Stripe system is also available in a mill/raw option.

The aluminium fencing is easy to install and produces stunning results that will last for years to come.

The boards and slats can also be easily incorporated into steel gate frames and fixed to steel posts. In fact, with the easy to fix angle system, they can be fixed to almost any post you want, creating that privacy that is requested by so many clients these days.

Free samples are available of slats, infills and top caps in both colour choices and the clear acrylic infills.
