## **Fläkt Woods takes stand at FoodEx 2016**

***Fläkt Woods, a leading manufacturer of ventilation and air movement products, is set to showcase the JMh aerofoil fan range at this year's FoodEx exhibition, on stand S298 – the company's first venture at a dedicated food show.***

Visitors are invited to meet the Fläkt Woods' team of experts at the show, which is being held on April 18-20 at the NEC in Birmingham, and will give the opportunity to see the revolutionary JMh range close up.

[Lee Finch](#), industrial sales director at Fläkt Woods stated:  
"Providing the optimum level of quality ventilation is paramount in all aspects of food processing environments. A highly efficient and effective ventilation system will ensure that all process requirements such as heating, cooling, chilling and filtration are met, as well as maintaining the essential comfort levels for occupants – meeting health and safety requirements.

"At this year's FoodEx, visitors will be able to view a plate mounted and short cased fan, which are particularly suited to OEM equipment providers and restricted space installations. The JMh range includes the long cased version that is commonly built into complete systems in refurbishments or new builds. Fläkt Woods' expert sales engineers will be at hand throughout the event allowing visitors to obtain advice for specific applications and tailor-made HVAC packages."

Fläkt Woods' JMh aerofoil fan has been specifically designed for the food sector. It not only tackles health and safety issues, but also meets high the levels of corrosion resistance and hygiene levels required by the industry. The JMh offering also includes units with stainless steel construction and options for robust galvanised treatment.

The range utilises the proven Fläkt Woods aerofoil technology to ensure the legal efficiency levels are met by incorporating dedicated impeller blade designs with an aerodynamically optimised hub design that enables the fan to deliver high efficiencies of up to 77 per cent. This results in low specific fan powers meaning compliance with the latest ErP regulations; therefore installed running costs are minimised - significantly reducing running costs and carbon dioxide emissions.

To find out more, come and meet the Fläkt Woods' team at FoodEx in Birmingham, on stand S298.
