Flexseal app now available to all online

Manufacturer Flexseal has now announced that its handy new app is available online, as well as through the Apple and Google app stores.

The app helps merchants and end users to find the right product for the customer's application just by answering a few quick questions. It can instantly find the right coupling, saddle and pipe seal product codes, with links to further product information, if required.

The app can now be found at findmy.flexseal.co.uk , so that customers can use it on a computer or on any smartphone, regardless of operating system. The app was originally released during August for Apple and Android users and can still be downloaded from the relevant app store for those devices.

"The feedback we have so far from customers using the app has been overwhelmingly positive. Creating this new online version will make it available to even more customers in even more circumstances," stated Flexseal's MD Lee Pashley.
