## **Steel flood doors installed at rugby club devastated by floods**

***The Flood Company has recently completed the supply and installation of steel flood doors at Heath Rugby Union Football Club in Halifax, West Yorkshire.***

Like many homeowners and businesses in the Calderdale area, the rugby club was devastated by the flooding that occurred over the Christmas and New Year Period in 2015.

The first photo, taken at the height of the flooding, shows just how bad things got. But, thanks to the help of club members and countless volunteers who carried out the clean up job, the club is back on its feet.

To prevent and minimise damage caused by any future flooding, Heath Rugby Union Club turned to Huddersfield-based The Flood Company to install four Steel Flood Doors.
