Flowcrete UK's Complete Flooring Solution at Pro2Pac

From project management expertise, high performance hygienic floor finishes through to stainless steel drainage systems – Flowcrete UK will be highlighting the benefits of its integrated flooring solution, developed specifically for the food and beverage sector, at Pro 2 Pac.

The flooring manufacturer will show from its stand at the event – number S2330 – how its complete flooring service is designed to help specifiers get more from floors for their projects.

Flowcrete has more than 30 years within the [food and drink industry](#) – carrying out projects for Blue Chip clients including Thorntons, KP Nuts, Nestlé and Heineken – backed up with best in class customer and technical support services.

It offers an extensive range of [hygienic floor coating solutions](#) designed for specific food and drink processing environments. Antimicrobial finishes can also be specified across a number of [Flowcrete systems](#), using the silver-based Polygiene® technology.

Alan Dean, Managing Director of Flowcrete UK, said: "Flowcrete offers food processing and packaging clients a wide range of [hygienic floor coating solutions](#) that combine high strength with outstanding antimicrobial performance.

"Flowcrete systems are capable of withstanding all the rigours of the industry, including falling bottles, wheeled traffic, food spills, chemical spillage and even sugar and acids.

"Our floors are laid in a seamless application, which eliminates joints and cracks where fungi, moulds and mildew are harboured, to create a more hygienic and functional surface.

"Specific formulations can also be selected, which can withstand demanding maintenance regimes, including steam cleaning.

"Furthermore, Flowcrete's [Flowfresh](#) floors can be selected with the Polygiene® agent – a silver-ion based antimicrobial treatment placed deep within the floor finish.

"This system continually controls up to 99.9 per cent of bacterial microbes, for maximum hygiene performance underfoot – and the process remains active for the lifetime of the floor."

Flowcrete's extensive product offering also includes the industry-leading [Industrial Floorzone concept](#), unique to Flowcrete UK.

This system delivers the damp-proof membrane and [high strength Isocrete floor screed](#), topped off with a performance resin floor finish – all from a single source and installed by Flowcrete's approved contractor network.

Furthermore, through the option of [Isocrete Project Management](#), Flowcrete UK can offer a complete turn-key flooring solution to food processing and packaging clients looking to simplify the procurement of a new floor – for both refurbishment and new build projects.

Kevin Storey, managing director of Isocrete Project Management, said: "Isocrete Project Management enables us to act as a principal contractor, dealing directly with the main contractor or client, when this is the preferred route.

"The service offers the financial security to carry out large contract projects and provides a single point of contact for both the manufacturer and installation team.

"[Isocrete Project Management](#) only employs the services of Flowcrete UK's highly skilled and well established approved contractor network and the service is particularly beneficial for clients in the food and beverage sector, where the complete service includes the repair, restoration or re-laying of the concrete slab, the supply and installation of a damp proof membrane and [Isocrete Floor Screed](#).

"The works are completed with the design, supply and installation of a stainless steel drainage system and resin floor finish, including the choice of [Flowcrete Flowfresh](#) – a unique offer for the industry with its inclusion of the silver-based Polygiene® agent within the resin matrix.

"Professional indemnity insurance is also available and the highest quality materials are used, with the process operating within the quality standard ISO EN 9001 and the environmental standard ISO 14001."

More details can be found at www.flowcrete.co.uk/isocrete-project-management

[Pro2Pac](#) takes place on 17 - 20 March at London ExCeL.

Ends

Notes to Editors

Flowcrete UK Ltd, part of the Flowcrete Group, is a world leader in the manufacture of seamless industrial and commercial flooring with international manufacturing facilities in Europe, the Americas, Asia and Africa.
