Focus SB Bespoke Service Hits New Heights

Focus SB's bespoke design and manufacturing service has produced a 50-gang plate for a private dwelling in Scotland.

From initial design to delivery took the Hastings-based company six weeks including amends to the silk screening and engraving.

The plate includes a custom made back box, as Roger Kemp, Managing Director explains: "This was a bit of a challenge, even for us. We have in the past manufactured a 24-gang box, but we are extremely proud of the finished product, as is the client."

Due to its ability to design and manufacturer special wiring accessories, Focus SB is able to incorporate the modules and devices which are used to fully integrate multi-room sound and entertainment systems, lighting and heating controls or other types of control devices.

As one of the few UK companies to make its own metal and clear acrylic thermoplastic plates, Focus SB can manufacture any quantity without the need for long lead times.
