

Press Release
March 6th 2014

Heald to Exhibit at Home Office Security and Policing Event

After a successful run of shows last year, Heald will be hosting a stand at this year's ADS Security and Policing Home Office Event, taking place at FIVE in Farnborough from the 11th to the 13th of March.

Heald designs, manufactures and installs industry-leading, award-winning perimeter security products. These include the world's only surface mounted automatic bollard system the Matador, the unique shallow mount HT1-Raptor retracting bollard and the mighty HT1-Commander – currently the only roadblocker in the world PAS68 tested to arrest a 30 tonne truck travelling at 80kph.

Heald staff will be on hand, on stand G1, to discuss their products and services, including the brand new HT1-Mantis shallow mount bollard. If you would like to find out more about what Heald can do for you, please drop by.
