January 14<sup>th</sup> 2013

## Creative Komfort for Scottish Arts Agency

***Waverley Gate provides a new modern home in the heart of Edinburgh to the national agency for arts, screen and creative industries, Creative Scotland. A complete conversion of the 19<sup>th</sup> century 'General Post Office' building, the fit out by GHI Contracts was the Scottish Regional and National BCO award-winning entry for a commercial project of up to 2000m<sup>2</sup> for 2012.***

Komfort was appointed by Edinburgh Office JMArchitects to provide a range of single and double glazed Polar partitions for the fit out of the new office complex, helping to create a unique and modern finish for a 21<sup>st</sup> Century workplace. Their high quality glass partitioning was used to house permanent and flexible working areas, training and conference rooms with unique sliding door systems, and provide workspaces for visiting creative professionals.

Thanks to Komfort's glass partitioning solutions, Creative Scotland can now provide a public showcase at the heart of the capital city for the work of Scotland's artists and creative practitioners. The site is close to the city's main rail and bus terminals and has easy access to and from Edinburgh's airport. Most importantly, Waverley Gate delivers a modern and effective working space from which to support the creative sector of Scotland.
