**March 23<sup>rd</sup> 2017**

## **Metrotile BBA certificates updated**

***The team at Metrotile are always striving to offer their customers the very best lightweight steel roofing profiles. To achieve this, it is sometimes necessary to alter the choice of component materials that the company use to manufacture its tiles.***

Such a change has recently occurred, including a change to an alternative steel. This means the BBA has updated Metrotile's certificates accordingly to represent the change in materials.

The new certificates are available as downloads on the profile pages and under the 'certifications' tab on Metrotile's support page.

If you wish to discuss the BBA certificate update further, you can [contact Metrotile](#) for more information.
