NEACO's curved glass balconies featured at prestigious development

NEACO's Spectrum balustrade has been specified with curved glass panels to form some stylish corner balcony terraces at Dove Tree Court, a luxury development of Assisted Living apartments in Shirley, near Solihull, from McCarthy & Stone.

Richard Robinson, buyer at McCarthy & Stone, commented: "NEACO provided a full design and installation solution with close involvement in site meetings throughout the specification process. They were very responsive to our requests and proactive in their approach to delivering our design brief. The installation has been completed to a brilliant standard and I'm sure that we will be working with NEACO again on future projects."

NEACO's national sales manager, Richard Richardson-Derry, said: "NEACO's curved glass panels are one of our most visually impressive infill options. Their design and installation alongside some of our straight-panelled balconies at Dove Tree Court is certainly in keeping with the superior quality and prestige of this development and NEACO are delighted to continue our relationship with one of the UK's leading Assisted Living developers."

Dove Tree Court comprises 33 one and two bedroom properties purpose-built to provide high quality retirement accommodation for the over-60s. Its high specification includes a 24-hour, state-of-the-art security system, a Homeowners' Lounge for resident socialising and guest accommodation for friends or relatives.

Available in powder coated aluminium or stainless steel – or a combination of both – Spectrum is a precision-engineered modular system characterized by smooth, clean lines offering a high architectural aesthetic which is extremely durable and maintenance-free. The range includes a wood-effect finish and a comprehensive choice of infills, from toughened glass and rails to mesh, grilles and perforated panels. Spectrum comes with a class-leading Lifetime Guarantee and is now available on the National BIM Library at www.nationalbimlibrary.com/NEACO
