## **The Complete Waterproofing Solution from Newtons**

***After two years of extensive product development and testing, Newton Membranes is proud to launch its new range of structural waterproofing products. Features include: [Newton 201 RubberFlex](#) for waterproofing roofs, balconies and decks and [Newton 101F](#) for waterproofing concrete and masonry.***

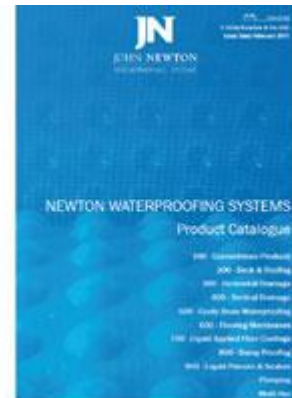

A new Product Catalogue includes highlights of all Newtons waterproofing systems. It is available at [www.newton-membranes.co.uk/structural-waterproofing](http://www.newton-membranes.co.uk/structural-waterproofing) or to request a hard copy of this, please e-mail Newtons at [info@newton-membranes.co.uk](mailto:info@newton-membranes.co.uk)

With over 160 years servicing the construction industry, Newton Systems can now be specified to deal with all aspects of structural waterproofing in both new build and refurbishment construction on a commercial and domestic scale. Newton and its NSBC (Newton Specialist Basement Contractor) network can provide full design and installation guarantees throughout the United Kingdom for waterproofing of:

- New Build and Domestic Basements
- Bridges/ Walkways
- Tunnels and Vaulted areas
- Car Parks
- Podium Decks
- Terraces/ Balconies/ Roofs areas
- Swimming Pools, Reservoirs and Pond
- Lift Pits
- Flat Soffits
- Water tanks and bunded areas

For free technical advice on any structural waterproofing, damp proofing or pumping requirements please call the head office on 0207 237 1217 or visit the website for technical data and case studies at [www.newton-membranes.co.uk](http://www.newton-membranes.co.uk)
