## **Bella Access Adds to its Growing Fleet of Niftylifts**

***Staffordshire-based Bella Access has added two new Height Rider 17 Narrows to its growing fleet of Niftylift work platforms.***

Jason Dalmas, MD and part owner (with Gary Smith) of Bella Access, is pictured taking a well earned break after unloading the latest addition to the company's expanding access fleet, two Niftylift Height Rider 17 narrows (HR17N).

When asked why Bella chose these new Niftylifts, Jason commented: "The 45ft sector of booms has not given the best returns in recent years. Being a new company, we have been able to plan our fleet 'afresh' and I've had time to study which machines got the best hire rate and utilisation. Initially we bought new and refurbished HR15Ns and when these proved successful we ordered some HR17Ns, all of course Bi-Energy. These two will be going straight out on reasonable length hires."

The Niftylift HR17N offers a working height of 17.2m and an impressive working outreach of 9.6m. At 1.5m wide and with Bi-Energy power (diesel and battery) available, it is perfect for a wide range of tasks but particularly well suited to industrial work such as factory maintenance.

Bella Access' is based in Stone (Staffordshire) and its fleet of Niftylift Height Riders is available for hire now. To find out more please call 0844 770 9580, or email [sales@bellaaccess.com](mailto:sales@bellaaccess.com).
