## Healey Tool Hire Buys its First Hybrid

***Healey Tool Hire in Colchester has bought its first Niftylift HR21 Hybrid, as seen in the photograph. With its Healey Tool Hire branding applied and ready to go out on its first hire, the HR21 Hybrid All-Wheel-Drive from Niftylift will offer a 20.8m working height with an outstanding 12.8m of working outreach, all from a chassis that's 2.27m wide and weighs just 6.5 tonnes.***

When asked about his recent purchase, Rafe Healey (Manager of their Colchester Branch) commented: "We have run a number of access machines including Niftylifts, JLGs and Skyjacks. However, we were always limited to a certain size due to transportation. We recently took the decision to up-rate our trucks so that we could carry larger booms and the ideal choice for us was Niftylift's HR21 Hybrid, due to its low overall weight coupled with its impressive working envelope."

He added: "Also important to us is our company's environmental commitment and the Hybrids from Niftylift with their Tier 4 power source, very low emissions and ability to be used on battery power go a long way to helping us achieve this."

The HR21 Hybrid was part of a larger Healey Tool Hire order with Niftylift, including HR12s and Nifty trailer mounts, and will hopefully be the first of many more Hybrids.

The team at Healey Tool Hire are contactable on 01206 793 400.
