Origin introduces record lead time on new window

Origin, a UK based, award-winning manufacturer of bespoke aluminium bi-folding doors, windows and blinds, has reduced the lead time on its aluminium flush casement windows to just one week; a record lead time for a made-to-measure system within the glass and glazing industry.

Available on Origin's most popular RAL colours, the reduced lead time means that customers can have their bespoke windows manufactured and delivered within seven days of the order being placed.

As Origin designs, manufactures and assembles all of its products in the Buckinghamshire based factory, it means that the company has complete control over product quality, and this is further enhanced by the stringent quality checks that occur at each stage of the manufacturing process.

Origin already offers a unique 'Your Lead Time, Not Ours' zero lead time service on its doors, and aims to replicate this on the windows by 2015.

Neil Ginger, CEO at [Origin](#), said: "Offering a 'Your Lead Time, Not Ours' zero lead time on the Origin Bi-fold Door is a pivotal part of our offering to both trade and end customers, so it is important that the new Origin Window replicates this to help maintain the high levels of service that our customers have come to expect from us.

"Since launching the new window earlier this year, we're proud to have halved the lead time on each bespoke system, and are continuing to improve our processes to offer the shortest lead times in the industry."

Like all other Origin products, the Origin Window has been designed and engineered at the company's High Wycombe factory following demand from trade partners seeking a window to match the aesthetic and quality of Origin's folding sliding door system. The aluminium window frames allow for narrow sightlines, whilst providing superior thermal performance and improved acoustic dampening. This makes the Origin Window the perfect match for any modern build, as well as an ideal replacement for windows in a period property.

The Origin Window is available from www.origin-global.com
