Planet Partitioning welcomes two new Directors to the Board

Planet Partitioning is delighted to announce the appointment of two long standing employees to its Board of Directors. Mark Hilson, Regional Director of Planet Contracting's Southern Division and Fraser Green, General Manager of Planet Products, were appointed in May 2017.

With the Board now comprising 10 operational members of staff, representing all facets of the business, Planet endeavours to achieve the highest standards of product innovation and installation service across its five UK regional offices.

Fraser has headed up Planet Products Limited since 2010 and his role encompasses the management of the fabrication, assembly and distribution facility in Burgess Hill. He said of his appointment: "As Planet's vision to offer superior service and innovative products to their customers goes through an exciting phase, I am delighted to be joining the Planet Board, working closely with the other members to ensure that our partitioning range continues to exceed expectations and provides the highest quality product to the market."

Before Mark Hilson was appointed as Regional Director of the South / London Division, he managed the Contracts Department and brings an in-depth knowledge of product design and installation to the role.

He commented: "I'm very pleased to be given the position on the Board of Planet Contracting Limited. Throughout the past few years, I have enjoyed contributing to the growth of Planet, which has not only been financial but also, and equally importantly, to our Health & Safety culture and professionalism.

"I feel the future for the company is very positive and I look forward to being a key part of the infrastructure taking us forward."

The Directors would like to congratulate Mr Hilson and Mr Green on their appointments.
