Playrite Creates Fairytale Setting for Schoolchildren

Children at a Leicester school have an outdoor classroom akin to a theme park or fairytale woodland, to capture their imaginations while they learn. The bright coloured flooring surfaces by Playrite and the toadstool seats sourced by Leicester County Council have already created a great amount of interest.

The outdoor classroom featuring artificial surfaces by Playrite is one of a number of improvements planned at The Hall School in Glenfield.

All Play Services worked with Leicestershire County Council to complete the project, where the Matchwinner Velour carpet by Playrite was installed directly onto a pre-prepared compacted base. Holes were created into the base for the toadstools to be fitted into and the carpet was cut to allow for them to fit in seamlessly. Matchwinner Velour comes in 12 bright colours, and the school chose green as shown in the image, as well as covering other areas of the playground in red and blue.

Playrite representative Sean Colbert comments on the finished project: "This has been a really interesting experience working with The Hall School to create something a little bit different. The end result looks fantastic and we've already had loads of interest regarding the project. Because Playrite's Matchwinner Velour is an all-weather, low maintenance product, the school will really get the most from the surface all year around."
