## **Q-railing earns top marks for views with safety**

***Olympics supporters watching the athletics at the Maracanã Stadium in Rio de Janeiro, Brazil, are benefitting from huge areas of glass balustrades provided by Q-railing.***

Q-railing's glass railing systems combine slim lines and transparency with exceptional strength to give fans more space and a perfect view while keeping them safe. Easy Glass Slim, Easy Glass 3kN, Q-line handrail and glass clamp systems were chosen for the Maracanã Stadium during a modernisation project ahead of its use for the Olympics, Paralympics and the earlier FIFA World Cup. Altogether, the stadium features 16,000 metres of glass railing.

Excited fans are protected to the highest standard by the Q-railing systems, with the Easy Glass 3kN system able to withstand loads up to 3 kN.

More information about Q-railing's railing systems for stadia, shopping malls, public buildings or residential premises can be found at the [website](#)
