

Press Release
6th December 2010

Rainclear Set To "Steel" the UK Rainwater Market

Rainclear Systems Ltd is already known as a market leader for the supply of cast iron and aluminium rainwater systems and is proud and excited to announce the launch of a new and exclusive steel rainwater system.

Rainclear is the exclusive UK distributor for the Zambelli steel rainwater systems in galvanised and black coated finishes.

The Zambelli steel rainwater systems are available in a half round profile in 100mm, 125mm and 150mm widths; the 100mm and 125mm profiles are perfectly suited for contemporary new build and social housing projects with the 150mm profile being an ideal choice for commercial and agricultural applications.

Benefits of choosing the Rainclear steel system over other systems available include:

- Deeper capacity on all half round gutters

- Rainclear: 100mm x 70mm, 125mm x 80mm, 150mm x 90mm

- Fascia bracket has more holes and a larger surface area to fix into

- Higher capacity outlets due to larger funnels for more efficient water dispersal

- Gutter connector has flexible z spring rather than steel spring making installation easier than other systems

- Black coated systems are a cost effective UV stable alternative to PVC.

All of Rainclear's steel rainwater products are available at competitive prices via its full e-commerce website at www.rainclear.co.uk or for a more personal experience, please do not hesitate to contact one of the dedicated sales team on 0844 414 22 66.
