Eco Resin Bound features on two award winning stands at the RHS Chelsea Flower Show

Two companies exhibiting at the Chelsea Flower Show who incorporated Eco Resin Bound Surfacing in their stand design have won awards.

Essex-based mail order, tree supplier Todd's Botanics on stand GPF18 won a Silver Gilt award. The stand uses Eco Resin Bound permeable paving to provide an attractive backdrop to the trees and bushes on display. A Golden Harvest blend was selected to cover the eight square metres of floor and Terracotta aggregate was used to feature the Todd's Botanic logo on the ground.

Abergavenny sundial designer and manufacturer, Border Sundials' stand RGB9 covers approximately 20 square metres and is a stepped construction with each step covered in Eco Resin Bound permeable paving with a Sesame Gold aggregate blend. Border Sundials was awarded a certificate of merit for outstanding presentation.

The surfacing was laid to each stand by Hertfordshire-based, Eco Resin Bound Approved Contractor Graveltech.
