**January 7<sup>th</sup> 2021**

## **Medal standard parcel deliveries thanks to Safety Letterbox Company**

***The latest addition to London's East Village - which was originally built for the 2012 Olympics athletes and visitors - is Victoria Plaza. The Safety Letterbox Company was delighted to produce mailboxes and parcel boxes for this sought-after development.***

Victoria Plaza, which has a beautiful view overlooking Victoria Park, is being developed by Get Living. The Safety Letterbox Co (part of the Renz Group) already had the pleasure of working with Get Living on Manchester's Middlewood Locks in Salford.

The myRENZbox intelligent parcel system has been a unique addition to the buildings with three variants of the system servicing three lobbies. A 23-box modular system within the Asteria House lobby; a 70-box system at Insignia point and an 83-box system at Laurel point.

All systems are fitted with wi-fi connection and bar code scanners and polyester powder-coated RAL 9005 jet black.

As the East Village continues to develop, additional added extras such as Hyperoptic Hyperfast Broadband which is readily available is satisfying the growing demand for living within a future-proofed environment, and Intelligent parcel boxes such as myRENZbox do just that.

myRENZbox brings peace of mind to those living on the developments by knowing they no longer need to wait at home for a delivery, and that they have a 24/7 facility to inform them that their parcel is safely stored.

If you're looking to future-proof your development by offering a first time, last-mile delivery solution then myRENZbox can provide you with an efficient, traceable solution open to all carriers.

Virtual demos are available, please contact Richard Wigley, Head of myRENZbox UK, by email on [richard.wigley@safetyletterbox.com](mailto:richard.wigley@safetyletterbox.com)
