Servaclean helps Harrogate hotel to reopen in style

During Lockdown, Servaclean has been working in conjunction with The West Park Hotel in Harrogate, helping them get their bar operation ready for reopening when the restrictions were lifted.

The company's relationship with The West Park Hotel, one of several Provenance Inns & Hotels venues with Servaclean installations, started back in 2014 when the team fitted the main bar counter at the venue. During Lockdown, Anthony Blundell from the hotel contacted Servaclean to replace their poorly functioning glasswash area, which had been previously fitted out by another supplier.

In addition to this, they had applied for an outside bar licence in the enclosed rear courtyard to provide some much needed socially distance safe drinking space. Approval was granted with just a couple of weeks to go before bars were allowed to trade and by the beginning of July, ready for their reopening, Servaclean had supplied and installed two complete portable bar units with custom digitally printed graphic panels and mobile bottle coolers, as well as replacing the full set of wine coolers in the restaurant area.

With the growing demand for quality outdoor bar equipment to safely serve valued customers and keep staff safe, West Park Hotel was able to utilise its outdoor space with Servaclean's [FOLDABar](#) portable bar units.

These portable bars are easy to assemble and fold away for transport and storage, making them ideal to capture extra trade for the remaining outdoor months and which could also be used indoors to create further serving counters in function rooms or event spaces.

If you are looking to redevelop or upgrade your bar area, please do not hesitate to get in touch with one of the Servaclean team on 01274 390038.
