## **Servaclean bar at haven Hopton holiday village**

The quality of the work speaks for itself at Servaclean, and it's therefore very pleasing when a client is so happy with the work done that they come back again in the future. This was the case for Hopton Holiday Village in Great Yarmouth, a charming seaside resort that is now host to not one but two Servaclean bar systems.

They were initially contacted by the park's owners, Bourne Leisure, to fit the resort's Marina Lounge Bar with one of their trademark 'BARFrame' stainless steel modular bar systems. As part of the free 'BARPlan' service, a bespoke design was produced for the bar in accordance with the client's exact requirements, including 3D CAD drawings to illustrate the bar's precise dimensions and functionality. With these plans in place, an expert team then set about supplying and installing the 'BARFrame' structure and fitments.

Such was the quality of the installation, as well as the overall levels of service provided by the experienced and helpful team, that when the time came to work on the park's Garden Restaurant Bar the following year, Servaclean was the natural choice:

Servaclean are delighted with the positive feedback on these two developments, and were also pleased to see the ease and efficiency of working behind a Servaclean bar cited as a major factor behind the Hopton team exceeding their sales targets as well as the park's high levels of staff retention.

Servaclean are experts in the design, supply and installation of top-class bar systems and fitments. With their free bespoke design process and flexible 'BARFrame' structure, they are able to cater to clients of all sizes and provide them with the bar that's perfect for them.
