Success for SIMONSWERK at 100% Design

At the September 100% Design Show at Earls Court, SIMONSWERK UK showcased the latest developments in hinge technology.

Visitors to the company's stand were able to view the power transfer **TECTUS** Energy system with new adapter plug connections, including one for FUHR motor locks, all with torsion-proof and snap fitting connection systems. Also on display were the CE marked high performance **TRITECH** solid brass hinge with concealed bearings, 7 designer finial options and new PVD finishes.

SIMONSWERK UK also demonstrated new versions of the heavy duty **VARIANT** range including the **VX 7532 3D 400kg** series, the "**Care**" option, specifically designed for public sector buildings where frame dimensions need to allow real clearance widths for doors to swing clear at a 90 degree angle and the "**Finger Protection**" hinge system.

The company also announced that the increasingly popular **TRITECH** hinge will also be on show at the **BIG 5 show** at the Dubai World Trade Centre in November.
