## **Evolution the Smart Solution for Flats Block**

***A block of flats in Streatham, London, has modern performance windows offering low maintenance while retaining the traditional steel window facade, following a refurbishment with Smart Systems' Evolution windows.***

Planning constraints demanded a like for like replacement to the steel windows at Walmsley House. Smart Systems' new Evolution, with its slim profiles that maximise sightlines and advanced polyamide thermal break technology, made the system the ideal solution for this project.

Evolution takes inspiration from traditional steel windows offering signature slim profiles that maximise glazing sightlines coupled with advanced aluminium polyamide thermal break technology. These credentials make Evolution the perfect choice for heritage applications where the refurbishment of traditional steel windows requires a prestigious system with the performance of modern thermally broken aluminium.
