Expanding S1E to host Open Day

June 13th will see an exciting event bringing together suppliers of innovative equipment for drain cleaning and repair. The Open Day will be hosted by Source One Environmental (S1E) at its new premises in Barnsley, South Yorkshire.

“There will be demonstrations of new products running throughout the day, including products never before seen in the UK,” said Glenn Cartledge, Managing Director of S1E. “As well as the chance to talk to the suppliers of these innovations, there will be competitions and offers. And, of course, we’ll have the barbecue fired up too!”

The company has confirmed that exhibitors will include those supplying lining equipment, repair and cleaning tools and inspection systems. There will also be the opportunity to see the range and depth of stock held at S1E’s new premises and to meet the whole S1E Team.

For more information or to confirm your attendance, please sign up on the homepage of S1E’s website <https://www.s1e.co.uk> , email contact@s1e.co.uk or call the team on 01226 397015.

Due to continued growth, S1E moved to larger premises earlier this month. The Open Day on June 13th will afford customers the opportunity to see the capacity of the new base for themselves.

“Our new building affords us much greater space to accommodate stock of all of our new product ranges and our new lining equipment,” stated MD Glenn Cartledge. “Since the business was created, more than a decade ago, we have shared a building with our sister company, Flexseal. Both businesses have grown since then and have plans to grow even further, so more space was needed.”
