Space Air RIBA approved CPD seminars

Space Air offers RIBA certified seminars at participants' place of work or at Space Air's training facility at head quarters in Guildford, Surrey.

The seminar is a RIBA Core Curriculum Topic – Climate, all about 'what a heat pump is' outlining the environmental considerations, factors affecting efficiency, comparisons of different types of air-to-water heat pump systems, advantages and disadvantages of systems, installation considerations, applicable standards and case study applications. The title of this seminar is 'An introduction to air source air-to-water heat pump systems, designed to replace conventional residential central heating boilers.' Please visit www.ribacpd.com to book a seminar.

All Space Air seminars available cover the fundamentals of air conditioning and industry legislation and include a single set of library information (available in hard copy or digitally) and light refreshments (for seminars arranged between 12 and 2pm). Presentations covering specific product topics can be prepared by arrangement.

For further information, please contact the marketing and business development team on 0845 319 1980, alternatively email marketing@spaceair.co.uk
