## **Taplanes shower pods the perfect fit for apartments**

***Modern luxury apartments close to Leeds city centre were equipped with shower units manufactured by Taplanes to the site's specific requirements.***

The project was developed by Citispace Urban Apartments, which caters for long-term living and aims to give customers best value and high standard facilities on rentals starting from six months. Robert

Kidd of Citispace approached Taplanes to produce some of its renowned leak-proof shower units for the Leeds properties.

Taplanes' regional engineer Jonathan Braunton worked closely with Robert and after in-depth discussions regarding width, depth and unit height together with the internal specifications, the Grampian Pod was chosen for the project.

The pods were installed in one piece, which saved a considerable amount of time over a more traditional build.

The units have been finished off beautifully and fit perfectly in these modern luxury apartments. More information about Citispace properties at [www.citispace.co.uk/](http://www.citispace.co.uk/)
