

**Press Release**  
**January 20<sup>th</sup> 2025**

## **The Safety Letterbox Company leading the future of UK mailboxes**

As property development evolves, the demand for smarter, safer, and more sustainable mail and parcel solutions intensifies. The Safety Letterbox Company, a leader in UK-manufactured mail and parcel systems, is ready to meet the needs of the future, offering cutting-edge designs and innovations tailored to the changing landscape.

### **Regulatory shifts shaping the industry**

With the UK government prioritising safety and sustainability, new regulations will drive change in mail and parcel systems. Developers must prepare for updates, including:

- **Enhanced Fire Safety Standards:** New guidelines, such as updates to Approved Document B (Fire Safety), will require fire-rated materials and designs to enhance building safety.
- **Secure Information Boxes (SIBs):** Expanding requirements under The Fire Safety (England) Regulations 2022 may mandate SIBs in mid-rise and mixed-use buildings, broadening compliance needs.
- **Secure Parcel Deliveries:** With e-commerce booming, theft prevention will focus on tamper-resistant designs and smart locking systems. Reports show parcel theft cost UK consumers £376.6 million in 2024, a trend that demands innovative solutions.
- **Sustainability Mandates:** Environmental considerations will drive the demand for UK-made products to reduce transportation emissions, supporting local economies and meeting sustainability goals.

The Safety Letterbox Company's 2-hour fire-rated mailboxes and IASME Level 2-certified smart parcel solutions set the standard for compliance and security, ensuring future-proof designs for developers and architects.

### **Design trends for modern properties**

In 2025, functionality will merge with aesthetic innovation:

- **Smart Technology Integration:** Digital locks, real-time delivery notifications, and app-based access will align with the rise of connected living environments.
- **Customisation and Branding:** Developers will seek bespoke designs that match architectural visions, from unique finishes to personalised branding.
- **Space Optimisation:** Compact, wall-mounted, or recessed mailboxes will maximise utility in urban developments without compromising design.

With in-house manufacturing and customisation capabilities, The Safety Letterbox Company delivers tailored solutions that combine safety, compliance, and aesthetic appeal.

### **Why choose The Safety Letterbox Company?**

With over 40 years of expertise, The Safety Letterbox Company is a trusted partner for future-ready mail and parcel solutions:

- **Regulation-Ready Designs:** Industry-leading compliance with fire safety, security, and sustainability standards.
- **Bespoke Expertise:** Collaborative design tailored to project needs.

- **Sustainability Focus:** UK-manufactured products reduce carbon footprints and support local economies.
- **Innovative Technology:** Smart parcel systems like myRENZbox enhance convenience and security.
- **Exceptional Support:** From consultation to aftercare, unmatched service at every stage.
