TimberTech's Eco-friendly Composite Decking Hits Ecobuild

TimberTech is back at Ecobuild for the first time since 2007. Last time the company visited, customers were excited about the range of eco-friendly composite decking and accessories, which were relatively new to the market at the time.

Fast forward five years and TimberTech's products have gone from strength to strength. Visitors to stand **S1954** will be able to see TimberTech's best-selling Vertigrain board in its most popular and contemporary shade of grey, or look at the new Earthwood Evolutions decking, on public display for the first time at Ecobuild. These new boards look just like hardwood decking, but with none of the high maintenance or environmental impact – they feature TimberTech's unique Hydrolock™ technology as well as a 25-year warranty with fade and stain cover.

So visit stand **S1954** and see TimberTech's eco-friendly composite decking for yourself. Pick up the brand-new, bigger than ever brochure and have a chat to the sales consultants, who can introduce you to the company's range. There will also be some gorgeous outdoor living products from TimberTech's greensquares range on display.
