Shiny New Aluminium Catalogue from Titon

Leading ventilation and hardware expert Titon has released its new Aluminium Catalogue – a comprehensive guide to the company’s wide range of fittings for aluminium windows and doors.

With more than 70 pages, the catalogue is divided into three main sections for windows, doors and ventilation. They include Titon’s own UK-manufactured ventilators and handles as well as products from market leaders Maco and Securistyle. The catalogue also provides an introduction to Sobinco’s huge range of aluminium window and door fittings – exclusively distributed by Titon throughout the UK.

The catalogue is already proving an invaluable source for both the window fabricator and specifier due to its detail, which includes dimensioned line drawings of many of the products. Backed by a dedicated technical and sales team with over 35 years experience, the catalogue also complements Titon’s existing Timber and PVCu Catalogue.

Julian Wiseman, Titon’s Aluminium Sales Director, said: “With all the information in one place, the new catalogue gives an excellent overview of Titon’s fittings, vents and hardware for aluminium doors and windows. We work incredibly hard to deliver the kind of products that specifiers and fabricators need, and we hope that this catalogue, along with the members of our enthusiastic, knowledgeable and experienced team, will go some way towards making their lives a little easier.”

For a copy of the catalogue call Titon on 01206 713800 or email alum@titon.co.uk
