

For release: October 2011

TITON AT 4* DELUXE EDWARDIAN LONDON HOTEL

Leading hardware and ventilation expert Titon has supplied over 80 Trimvent Hi Lift vents and canopies to the 4 star deluxe Crowne Plaza hotel in London. The vents and canopies were installed as part of a refurbishment of the hotel's rooms and suites which was completed in 2011.

The Titon *Trimvent* 4000 Hi Lift slot ventilators and canopies were fitted to new sash and casement windows manufactured by Vascroft Contractors Ltd. Commenting on Titon, Govind Kaylan, Joinery Manager, said: "Due to the age of the hotel, the products needed to be sympathetic to the architecture whilst offering effective ventilation. Titon always provides excellent technical advice as well as high quality products which made them the perfect choice for this project."

Trimvent 4000 Hi Lift is an aluminium slot ventilator that fits over a 13mm slot in the window. Providing an Equivalent Area (EA) of up to 6000mm² when fitted with the Hi Flow canopy, the TV4000 Hi Lift is ideal for both new-build and refurbished applications and is available in a variety of colours. Specifically developed for recent revisions to Part F of the Building Regulations and to improve performance for requirements throughout the UK and Europe, the Hi Lift range is 60% more efficient than previous models.

The ventilation and canopy or grille combinations have been tested in accordance with BS EN 13141. Additional features include a compression closing action, felted gasket for improved performance and specially designed linkages to ensure constant friction and smooth action.
