

Press Release
7th July 2011

Titon window restrictors used at Luxury London Hotel

Titon has supplied over 200 Flex window restrictors at Le Méridien Piccadilly hotel, London.

As part of a refurbishment of the hotel, Flex restrictors have been fitted to suites and bedrooms. Flex restrictors are face mounted cable restrictors suitable for PVCu, timber or aluminium doors and windows. Tested to 1200N with no failure, Flex restrictors offers excellent levels of safety and can be used with window sections that are both inward and outward opening making them perfect for retrofitting. Plus, for ease of specification and installation, special lengths are available to order for non-standard windows. Designed to complement all interiors and window design, Flex restrictors also feature a key operated deadlock for extra security and a push to release function to make operation easy.

Flex restrictors are part of Titon's wide range of restrictors that also includes Autolatch, Maco Laminated, Securistyle Restrictor stays, Maco Tech 100, PN Lock Bar and Maco Multi Vent. The range offers specifiers and installers a choice of designs to suit various applications and window opening types. Set in one of the most fashionable areas of London's West End, Le Méridien Piccadilly is recognised as the landmark hotel in Piccadilly Circus.
