Townscape launches Matrix canopy

Street furniture manufacturer, Townscape Products Limited, has launched a new range of modular canopy systems.

The Matrix Modular Canopy system is an innovative flat-packed shelter solution for schools, retail, transport, hospitals and commercial premises requiring all-year weather protection.

The shelter can be installed on all types of ground surfaces and provides a high quality, long lasting cover with quick and cost effective installation.

The system comes as an easy to build, flat-packed system in a range of colours. The roofing selection includes a clear translucent option, perfect for letting in natural light. Instead of having to purchase a made to measure outdoor shelter, the Matrix Modular Canopy is a solution which is flexible and can be built to the specific dimensions you require.

Jonathan Goss, managing director of Townscape Products, said: "This is the quickest and easiest installation for a shelter we've brought to market, making it extremely cost effective. The canopy provides a durable shelter for any area needing protection from the weather. The roofing provides an area for safe shading with 98 per cent UV protection and also gives good insulation and shelter in the winter, so it's perfect all year round."

The launch of the Matrix canopy system is part of Townscape's 40th anniversary celebrations. Jonathan Goss added: "We have been manufacturing and supplying high quality street furniture from our Nottinghamshire factory for four decades and the launch of Matrix reinforces our commitment to continue to innovate and lead the way for street furniture development in the UK."

To view the full range, visit the Townscape website: www.townscapeproducts.co.uk or contact the Townscape team on: 01623 513 355.
