## **New Cladding Gives The Beauty of Tile, Without the Hassle**

***New from Ukhomeinteriors Limited is a range of pvc cladding that replicates the look of bathroom tiles.***

Featuring eight colour options, the range panels are 1.2m long and 250mm wide with a recessed 'grout' line built in to emphasise the authentic look and hide any joints. Panels can be installed vertically or horizontally and be joined end to end as well as side to side. They are fully watertight.

This new range adds to the company's already extensive range of pvc bathroom cladding products which cover marble, mosaic, plain, woodgrain and painted effects. All install significantly more easily than tile, being lightweight and installed simply with adhesive over any existing wall covering providing it is relatively true; even over tile.

Once installed, maintenance and cleaning is also greatly reduced. There is less condensation than with tile, and no grout to go mouldy. They simply need to be wiped clean using solvent free, non abrasive products.

For full details visit the website at <http://www.ukhomeinteriors.co.uk> or call Ukhomeinteriors Limited on 0121 449 8525.
