2nd August 2010

Two New Beautiful Cornice Ranges from UK Home Interiors

Launched this month by Ukhomeinteriors Limited are two new ranges of cornice; Premier Additions and Premier 2.4metre.

Featuring 22 new designs, these products add to the company's already extensive range of high grade polymer cornices. The main advantage of this material is that it looks indistinguishable from plaster, but can be installed in as little as a third of the time. This is because the product is light in weight so can be handled easily and installed by one person.

Polymer cornices are also more durable than plaster and, not being brittle, are less prone to damage. They are pre-primed to require just one coat of paint, unlike plaster that can soak up several coats. The cornices are installed simply by using adhesives, and any gaps or joints can be quickly and easily filled for a perfect finish.

The Premier Additions range also features handy locating holes at each end of a 2-metre length which, when used with dowels, guarantee perfect alignment, whilst the Premier 2.4m range launches some favourite designs in a longer length.
