Driveway looking tired? Revive It!

It doesn't matter what the repair problem is, or what type of drive you have, Ultrascape's range of domestic paving products can provide you with a solution! Resulting in the drive of your dreams at a fraction of the cost.

Ultrascape's range of innovative and original products will repair potholes, remove oil and grease stains, fill cracks and holes, rejuvenate faded Tarmac and make your driveway, path or patio look like new!

If potholes are causing you problems, a Pothole Repair Kit is what you need. This easy to use kit allows you to fill in potholes, which is great news not just for your drive but for your car too! Alternatively, you may need Rapid Repair – a rapid setting product that will fill cracks and holes in concrete drives.

We all know that a faded drive or a drive with oil stains doesn't look great. Did you know that it can cost up to £4,500 to replace a Tarmac drive? Why bother spending all that money when Ultrascape can offer you a cost-effective solution. Stain Away and Drive Revive® allow you to remove oil and grease stains, and paint your washed out drive respectively. What could be easier?

As well as repair solutions we offer assistance with laying your new paved patio. PaveJoint is an easy to use jointing compound, perfect for all paved surfaces, just brush into joints and wash away the excess!

Seal & Stop is a one stop solution to stabilising jointing sand and preventing weeds from growing on your driveway, paths and patios.

Simply pour the product over finished paving using a watering can. Fix or Grout is a single solution for not 1, but 2 of the stages of laying paving. Use it as a bedding mortar or a pointing mortar. What's more it is suitable for use with all paving types.

For more information please visit www.ultrascape.co.uk, email katieh@instarmac.co.uk or call 01827 871871.

ULTRASCAPE is part of the Instarmac Group plc
