7th October 2008

EnviroVent provides a positive opportunity for 2 North Yorkshire School Leavers

Opportunity Knocks for Schools Leavers at EnviroVent!

EnviroVent, manufacturers of innovative and sustainable ventilation products, are looking for 2 enthusiastic individuals to train as apprentice technicians over a 3 year period. The first year will see the apprentices spending 1 day at the Harrogate site with the other 4 days spent at College studying for a BTEC National certificate in Mechanical Engineering. A reversal in the second year involves 4 days spent at the Harrogate office and 1 day at college. The final year will be entirely site based, gaining valuable experience – forming a solid foundation for the candidate's future career prospects.

"This is a great opportunity to receive on-the-job training whilst attending college one day per week and earning a wage!" HR Manager, Caroline Wright said. "We are looking for enthusiastic individuals with a grade C or above in Maths, English, Science or the equivalent."

In the current climate of 'doom & gloom' this is a super chance to join a company who supports the local economy and whose innovative product development is going from strength to strength.
