## **SunSeeker Doors launch new SunSeeker Slimline Doors**

***SunSeeker Doors has added a new product to its portfolio: SunSeeker Slimline Doors.***

SunSeeker Slimline aluminium frames are only 20mm (less than 1") each side of the glazing so that your view through closed doors is virtually uninterrupted. To compare, most frames on double glazed doors are at least 60mm.

SunSeeker Slimline Doors are not bifolds. They comprise a standard hinged door plus a number of interlocking doors that can independently slide along a track, in much the same way as traditional sliding patio doors. Their ingenuity lies in the turn and stack facility at the end of each track, enabling the panels to lay neatly and unobtrusively against the side wall, in much the same way as bifolding doors.

This innovative system uses the best elements of sliding doors and combines them with the best elements of folding doors. SunSeeker Slimline Doors can be used internally as room dividers or externally as patio doors.

The 20mm frames are made of powder-coated aluminium and are available in a range of colours from standard white to grey, silver, green, blue, sepia brown or other RAL colour. There are also glass options: clear (standard, and best for great views), tinted (if too much sunlight is a problem), obscured (for more privacy) and more.

If you would like more information on the Brand New slide-turn-stack SunSeeker Slimline Door system for your home, call SunSeeker Doors on 01582 492 730.
