Tool Up With Fat Hog

Fat Hog has already set the industry alight with its impressive selection of brushes, rollers and workwear but now it boasts a vast array of tools designed to make the lives of professional painters and decorators easier than ever before.

The wide selection of tools have been designed to ensure each and every professional job can be completed with the maximum performance and minimum effort.

Leading the charge is the Folding Utility Knife, which has been perfectly engineered and designed for easy blade access and optimum productivity, while the Flexible Filing Knife, Stripping Knife and Chisel Knife all steam onto the market to make each job run that little bit smoother as part of the Scale Tang Tool range.

Offering excellent performance as part of the Soft Grip Tools range and acting as an alternative to the Scale Tang Tool range are the Flexible Filing Knife and Stripping Knife. The soft grip handle guarantees comfortable use, while the deep set blade offers strength and durability. Also part of this range is the Combination and Triangular Shavehooks, which are perfect for removing coatings from contoured and flat surfaces respectively.

Fat Hog's tool range also offers a Seam Roller, Window Scraper, Paper Hanging Scissors, as well as replacement blades. And what better place to keep all your tools together than in the sought-after Decorator's Tool Bag, designed for heavy duty use from one job to the next.

For more information on Fat Hog's stunning product range please visit <http://www.fathog.co.uk> or call 01924 354100.
