

Press Release

13th October 2009

Visit Kingkraft at Interbuild 2009

Bathing equipment specialists Kingkraft Ltd will be in Hall 5, stand A64 at this year's exhibition at the NEC.

Sheffield based Kingkraft Ltd is exhibiting in October at Interbuild, the leading exhibition for the construction industry. Kingkraft specialises in assistive equipment for people with mobility difficulties and a new ceiling mounted hoist system, the GH3, will be on display at the Kingkraft stand (Hall 5/A64). The company believes the GH3's classic yet contemporary appearance will convince building specifiers that GH3 installations allow a perfect blend between both new and existing architecture and interior design to be achieved.

Interbuild takes place on 18-21 October 2009 at the NEC, Birmingham and is noted for featuring the best innovations for building and refurbishment products, materials and equipment. As provision for people with mobility difficulties is of major importance in designing and building work, Kingkraft MD Nigel Harrison is expectant that the new product, together with the large range of assisted bathing equipment, manufactured at the Kingkraft Sheffield factory, will be of significant interest to delegates and other exhibitors.

Nigel says, "Kingkraft provides equipment and consultancy advice to architects and builders looking to incorporate equipment to assist disabled people into homes, offices, schools and public buildings. We have been called on for many major projects to supply and install assistive equipment into buildings. In a recent project, we supplied a major track and hoist system in to a school in Cardiff which caters for children with cerebral palsy. The system had to help move children from changing areas to a swimming pool a little distance away and then lower them into the water. The project overcame a number of significant design challenges and provides a good example of Kingkraft's expertise."

Ends

Notes for Editors:

Kingkraft have been manufacturing specialist bathing equipment since 1984. The company is now established as one of the foremost suppliers in the assisted bathing market. We produce stylish, beautiful yet functional products that can be used in thousands of homes, hospitals and residential environments to help provide invaluable assistance and independence.

In addition, we are now growing into a substantial supplier of paediatric products that help to promote inclusivity in the home or school environment; including Sensory, Seating, Mobility and Moving & Handling.

Guldmann GH3 Hoist system:

Ceiling mounted hoist systems are often an ideal solution for lifting and moving people from one place to another in all kinds of care, school or home environments. With the lifting equipment mounted out of the way on the ceiling, you keep the floor space uncluttered and it's much easier, quicker and safer to get around. Kingkraft supply the Guldmann ceiling mounted system which are renowned for reliability, comfort, safety & ease of use.

The new GH3 system is a modular design concept whose classic yet contemporary appearance makes sure GH3 installations blend perfectly with both new and existing architecture and interior design. There are a range of modules available which make it easier to adjust GH3 set-ups to match individual needs as regards functionality, specifications and budgets.

The GH3 system is easy to install and Kingkraft engineers are fully trained to ensure a straightforward process. It is designed to tackle particular spans and weighting lifts therefore this combination makes installation an easy and rapid. Kingkraft also offer a full servicing programme and an automatic signal indicates as soon as a service is required.

This new system will be available for demonstration at Interbuild on the Kingkraft stand: hall 5/A64.
